

# Get More ROI From Your TMS

PCS Transportation Management Platform Overview

# The Growth Challenge Faced By Transportation Companies

Today's transportation businesses are aiming to meet growth goals through acquisition, investment, and innovation spurred by the pandemic. Unfortunately, their customers are looking to reduce transportation costs. According to a Statista survey, **73% of shippers said the cost of transportation was their biggest challenge.**

Because of this push-and-pull dynamic, efficiency improvements are crucial to business growth for transport companies. Luckily, **an end-to-end TMS platform** can eliminate challenges that make it hard to scale (like limited information about loads and load bookings), reduce manual processes, and streamline fragmented communications.

## End-to-End PCS Transportation Management Platform

# Solutions for the Entire Business

The average business uses 129 software apps, which can be a headache.\* That's why the PCS platform is an all-in-one way to manage every aspect of your business. It's built to reduce the resources spent on other software, training users, and additional services. PCS replaces extra applications and easily integrates with existing business tools.

## Benefits In the Office

Save time with combined dispatch, accounting, and fleet management functions

Speed up service delivery and increase margins with visibility into data across every department

Reduce time wasted on booking loads with legacy software or manual processes

Enable office personnel to work more efficiently and focus on business growth

Easily expand carrier or brokerage services with one scalable management tool

Integrate TMS software with your website and empower shippers to book services

## Benefits On the Road

Increase customer retention with visibility into delivery progress, invoicing accuracy, and timeliness

Increase driver retention with automated, low-touch communication that allows them to focus on the job

Manage driver workloads and scheduling more efficiently

Differentiate your business with tools that simplify driver and customer communication

# Core TMS Express Platform Features

## Dispatch

Our real-time dispatch is automated and tailored to the complexities of multiple transport services, so companies can run more trucks with fewer resources.

- **Intelligently designed, real-time operations management**
- **Freight and equipment matching**
- **Built-in linehaul and accessorial ratings**
- **US DOE-provided fuel surcharge rating**
- **Automated freight status updates to shippers**
- **Two-way mobile communication capabilities**
- **Automated safety and profitability monitoring**

It can also import details about:

- **Rate analysis**
- **Spot market**

## Accounting

Our accounting tools accelerate invoicing by importing load details and all relevant information into one place.

TMS Express Accounting is built for the transportation industry and makes it easy to manage:

- **Receivables and collections**
- **Payables and cash management**
- **Payroll and settlements processing**
- **Financial controls and analysis**

It can also integrate with tools for:

- **Factoring**
- **Insurance**

## Fleet Management

The TMS Express is the only system that fully incorporates safety and compliance, vehicle maintenance, and fuel management into one comprehensive system that interacts in real-time with dispatching and accounting data.

It can also import details about:

- **Route and mileage**
- **Driver management**
- **Asset tracking and management**
- **Onboarding**

# About PCS

PCS Software created the trucking industry's most effective transportation management platform (TMP) to improve fleet management and delivery systems and increase profits for our customers. Through innovation and invention, our software individualizes work routines, consolidates workflows, and streamlines management controls to improve accountability, transparency, and eliminate costly and redundant manual processes.

Trucking companies and freight brokers trust PCS to optimize their dispatch, accounting, and fleet operations. TL, LTL, Intermodal, and freight brokerage services use our TMP to automate operations, easily access information, and reduce outdated inefficiencies to maximize sales and revenue.

**Founded in 1997 and located in Shenandoah, Texas, PCS Software is a leading developer of hosted software solutions designed specifically for the ground transportation industry.**

**PCS can help you grow your transportation business.**

## Safety and Compliance

Whether you're already using ELDs to stay in compliance or you're in the market for new technology, TMS Express helps your drivers stay on the road safely.

- **Integrations with major ELD brands**
- **Trucker safety notifications**
- **Easy-to-use ELD manager**

## Mobile

The free Mobile Express app gives owners and operators a bird's eye view of the business, while making it easy for dispatchers and drivers to communicate. It also streamlines operations with:

- **Automated shipment location notifications**
- **Document upload capabilities for drivers**
- **Real-time business insights for company leadership**

## Reporting

Robust reporting is baked in, including: compliance, financial, operational, ad hoc, and predictive analytics reporting. All come with drill-down capabilities and are available on the Mobile Express application.
